Webhooks, REST API, Postman, SiteMinder, Opera PMS, SISTIC

Projects

Order Creation Automation

Ninja Van

Designed and developed a custom automation solution utilizing Google Sheets and Apps Script with REST API integration to validate addresses and phone numbers. This innovative solution successfully eliminated 90% of manual data entry work, significantly improving data accuracy and operational efficiency.

Zendesk Migration

Klook

Led a \$1.18 million platform migration project, successfully completing system configuration and launch in just three months across all channels (Voice, Email, Chat, Social Media). This initiative significantly enhanced system capabilities and improved agent efficiency.

Cost Optimization

Klook

Optimized phone line and software license usage by restructuring usage patterns and implementing monthly forecasting models, which enhanced budget control and reduced operational expenses.

Contact Center Centralization

Melco Crown

Consolidated contact center operations across multiple hotel properties, standardizing processes and procedures to streamline operations and reduce costs.

Multi-Hotel Pre-Opening

Melco Crown

Created a centralized knowledge base to boost operational efficiency and agent expertise, conducting training sessions that equipped team members to deliver exceptional service during the opening of new hotel properties.

Experienced CX strategist committed to operational excellence and continuous improvement. By harnessing technology and automation, I streamline processes and enhance service delivery, ensuring a seamless customer journey and empowering support teams.

Experience

Ninja Van

Logistic

Shipper Support Manager (Full-Time)

🔗 [Website](#)

2024 - Mar 2025

Subang Jaya, Malaysia

- Lead daily support operations across chat, email, and voice, ensuring SLA consistency during peak demand through agile staffing and dynamic queue management.
- Introduce daily huddles and weekly performance reviews to enhance operational transparency, accountability, and facilitate rapid issue resolution.
- Establish robust cross-functional escalation pathways with Operations, Product, and Finance teams to accelerate resolutions for high-value shipper incidents.
- Update Standard Operating Procedures (SOPs) to streamline complex workflows and strengthen quality assurance (QA) frameworks, driving higher First Contact Resolution (FCR) and service consistency.
- Optimize IVR structures and routing logic to accurately capture customer intent and prioritize VIP segments, significantly reducing Average Speed of Answer (ASA).
- Deploy real-time Looker dashboards to replace manual reporting, enabling data-driven decision-making for effective backlog management and staffing.

Klook Travel

Fin Tech

CEG System Manager (Full-Time)

🔗 [Website](#)

2021 - 2022

Kuala Lumpur, Malaysia

- Design optimal routing logic across omnichannel touchpoints (chat, email, voice, social) to align agent skills and service level agreements (SLAs) with business tiers.
- Optimize workflow logic and knowledge base taxonomy to minimize ticket reopen rates and reduce resolution times.
- Manage strategic vendor relationships for telephony and customer experience (CX) platforms, implementing rigorous license tracking to optimize operational costs.
- Develop and monitor business continuity plans to ensure system resilience during technical outages.
